

TERRENCE NAILS

Washington, DC | 202-503-7326 | terrence.nails@outlook.com | [linkedin.com/in/terrencenails](https://www.linkedin.com/in/terrencenails)

PROFESSIONAL SUMMARY

Senior technology leader with 10+ years of experience designing, testing, and modernizing enterprise infrastructure and cloud solutions in mission-critical environments. Skilled at mapping emerging technologies and information security requirements to organizational needs, with hands-on cloud architecture experience and a proven record advising leadership on technology standards, governance, and modernization strategy.

CERTIFICATIONS

AWS Solutions Architect Associate (SAA)

PROFESSIONAL EXPERIENCE

TBM Technology Consulting

Systems Test Engineer III

Feb 2026 - Present

- Leads evaluation and integration of emerging technologies and cloud solutions, conducting research and hands-on testing of new products, patches, and software in a sandbox environment prior to production deployment, ensuring cohesive architecture across interdependent systems.
- Deploys and manages cloud infrastructure and services (AWS), supporting scalable, high-availability solutions and informing architectural decisions for enterprise applications.
- Advises senior leadership on technology solution recommendations, mapping emerging technologies and information security requirements to organizational needs and translating findings into actionable modernization guidance.
- Documents test findings, standards, and technical recommendations, contributing artifacts that support consistent, scalable technology adoption across teams.
- Owns systems lifecycle management and cross-team production standups, coordinating implementation schedules and maintaining operational continuity across the enterprise network.

Leidos

Defense Cybersecurity Operations Lead

Dec 2024 - Feb 2026

- Led enterprise-wide incident response operations, including threat identification, containment, forensic analysis, and recovery, for high-impact security events across a complex federal network.
- Executed vulnerability management by conducting credentialed and external assessments, mapping findings to CVEs and prioritizing remediation based on system exposure and organizational risk.
- Enhanced monitoring and detection capabilities by updating response playbooks and runbooks, refining alert logic, and identifying operational gaps.

- Advised senior leadership on security posture and risk, translating technical findings into guidance aligned with organizational priorities.

Defense Logistics Agency

Network Security Analyst

Mar 2023 - Dec 2024

- Monitored and analyzed network and security architecture, performing root-cause analysis and forensics across firewalls, network security groups, and SIEM platforms.
- Designed and maintained ACLs across network segments to enforce least-privilege access, aligning security architecture with organizational risk tolerance and compliance standards.
- Correlated firewall, endpoint, and identity logs to triage alerts, identify indicators of compromise, and escalate confirmed incidents.
- Supported incident response and contributed to the design of detection and monitoring controls across the enterprise environment.

U.S. Army

Network / Systems Administrator

Feb 2016 - Mar 2023

- Deployed and maintained enterprise infrastructure spanning VMware ESXi virtualization, Palo Alto firewalls, and Cisco routing and switching to support organizational mission requirements.
- Managed virtual network infrastructure within ESXi, including port groups and vSwitch configuration, to support segmented, secure environments.
- Continuously monitored CPU, memory, and interface utilization across infrastructure to detect performance issues early and ensure stable service operations.
- Investigated network and system outages, identifying root causes and implementing remediation to restore stability and prevent recurrence.

SKILLS

Cloud Architecture (AWS, Azure), Enterprise Architecture, Zero Trust Architecture, TOGAF, Technology Standards & Governance, Information Security Risk Mapping, Vulnerability Management, Systems Lifecycle Management, Network Security, Ansible, Linux, Technical Leadership

EDUCATION

University of Maryland - Bachelor of Science in Computer Networks & Cybersecurity
